

# FULL STORAGE TILED STOVE

The small full-featured tiled stove to enjoy the full benefit of warmth

## Tomorrow's Classic for Today

Living tradition finds its equivalent in the present time. The full storage tiled stove by the Sommerhuber Ceramic Manufactory is delivered in parts and is completely and tidily assembled within one day. This makes it perfect for the subsequent installation. The new, small version of the tiled stove can be customized in a variety of glazes and structures. This turns the full storage tiled stove into a classic that stores heat and slowly releases it as comfortable ceramic radiant heat.

Title  
2140: round  
Glaze: 484 aquamarine medium lustrous  
Technique: Ofen Innovativ  
KE 182,6

2139\_01: round, flute fine  
Glaze: 482 tourmaline dark lustrous  
Technique: Ofen Innovativ  
KE 182,6

## The smallest full-featured tiled Stove

---

With a height of only 163 cm, the full storage tiled stove is the smallest tiled stove by the Sommerhuber Ceramic Manufactory. With its low weight of only 345 kg, it is suitable for installation onto an existing underfloor heating system.

## A big piece of quality of living

---

Like all tiled stoves the Sommerhuber Ceramic Manufactory, it is a (small) piece for a great quality of living. The storage capacity of the heat storing ceramic fulfills the need for high energy efficiency and the independent heating option with the renewable, domestic energy source wood. The full storage tiled stove is perfectly suited as an independent, alternative form of heating in any living space.

 Technique: Ofen Innovativ  
 KE 182,6

Outside:  
 high-quality Sommerhuber heat storing ceramics  
 Dimensions round: 163 x Ø 53 cm  
 Dimensions square: 163 x 50 x 50 cm

Inside:  
 Ofen Innovativ KSO  
 examined according to DIN EN 13229  
 DIBt RLU tested Z-43.12-286

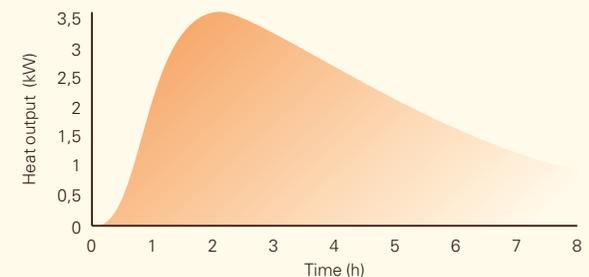

Technical data according to the manufacturer  
 for low-energy house: approx. 65 m<sup>2</sup>

Nominal heat output full storage mode:  
 average 2,2 kW / h over approx. 8 h  
 Nominal heat output full heating mode:  
 average 4,2 kW / h over approx. 3,5 h  
 Efficiency: 81,6 %  
 Storage period: up to 8 h  
 Amount of wood: min. 2 kg - max. 5 kg  
 Length of log: max. 38 cm  
 Flue tube rear or top: Ø 13 cm  
 Connection height flue pipe centered: 149,5 cm  
 Combustion air connection: Ø 10 cm  
 Weight: approx. 345 kg  
 Short installation time: assembled by specialist  
 in approx. 1 day

Available in many high-quality Sommerhuber glazes

### Heat storage time

Heat once – and have a comfortable ceramic  
 heat radiation for up to 8 hours
